Ranking of India and Neighbouring Countries in Global Hunger Index (GHI) from 2020 to 2023

S. No.	Year	Out of Total Countries	Ranking in Global Hunger Index (GHI)					
			India	Sri Lanka	Nepal	Bangladesh	Pakistan	Afghanistan
1	2020	107	94	64	73	75	88	99
2	2021	116	101	65	76	76	92	103
3	2022	121	107	64	81	84	99	109
4	2023	125	111	60	69	81	102	114

How the GHI Is Calculated

Each country's GHI score is calculated based on a formula that combines four indicators that together capture the multidimensional nature of hunger:

Undernourishment: the share of the population whose caloric intake is insufficient;

Child stunting: the share of children under the age of five who have low height for their age, reflecting chronic undernutrition;

Child wasting: the share of children under the age of five who have low weight for their height, reflecting acute undernutrition; and

Child mortality: the share of children who die before their fifth birthday, reflecting in part the fatal mix of inadequate nutrition and unhealthy environments.

Calculation results in GHI scores on a 100-point scale, where 0 is the best score (no hunger) and 100 is the worst.
