# Definition of Global Innovation Index (GII)

The Global Innovation Index (GII) is an annual ranking by the World Intellectual Property Organization (WIPO), Cornell University, and INSEAD, which ranks countries by their innovation capabilities and performance, using ~80 indicators covering institutions, human capital, infrastructure, market sophistication, and creative outputs to assess innovation ecosystems. Recognized by the UN, it serves as a key tool for policymakers to understand and improve their national innovation strategies, highlighting strengths like research and technology, and weaknesses like business sophistication.

## What it measures

- **Innovation Inputs:**

Measures the elements that enable innovation (e.g., education, infrastructure, market sophistication, business sophistication)

- **Innovation Outputs:**

Measures the actual results of innovation (e.g., knowledge & technology outputs, creative outputs)

## Key Features

- **Comprehensive Data:** Uses data from sources like the World Bank, WEF, and ITU.
- **Policy Tool:** Helps governments identify strengths and weaknesses to guide innovation policy.
- **Global Benchmark:** Ranks over 130 economies, providing comparative insights.
